ASIAN CONCRETO BRICKS

Asian Concreto bricks are converting Nepal's construction landscape with premium-quality concrete bricks, offering a sustainable and durable alternative to traditional clay bricks. Manufactured in a fully automated facility in Nawalparasi, these bricks are crafted using advanced German technology, ensuring consistent quality and performance.

Why Choose Asian Bricks?

1. Superior Strength and Durability
Asian Bricks boast a compressive strength of ≥10.5 N/mm², making them ideal for both load-bearing and non-load-bearing structures. Their robust nature ensures longevity, reducing the need for frequent repairs.

2. Precision and Consistency
With dimensions of 230 x 110 x 70 mm, these bricks offer uniformity, facilitating easier construction and reducing material wastage. Their precise sizing also contributes to a cleaner finish, minimizing the need for excessive plastering.

3. Enhanced Thermal and Sound Insulation
Designed with excellent thermal and acoustic insulating properties, Asian Bricks contribute to energy-efficient buildings and ensure comfort in Nepal's diverse climatic conditions.

4. Eco-Friendly Manufacturing
The production process emphasizes sustainability, utilizing eco-friendly materials and methods that reduce carbon emissions and minimize environmental impact.

5. Versatile Applications
Available in red and grey hues, these bricks are suitable for various applications, including:

- Fair-faced walls
- Partitioning walls
- Load-bearing walls
- Boundary walls
- Decorative facades
